GoodJava, Inc.

Software Engineer Intern

Morton, IL

March 2023-Present

- Developed and maintained web applications using the LAMP stack
- Used linux terminal commands in Termius to assist with server migration
- Developed the front end for Synergy Surgical's website, enhancing user experience for a medical supplies company
- Maintained Content Management System for various websites to provide optimal software solutions to the clients

Target

Guest Advocate

East Peoria, IL

May 2021 - January 2024

- Enhanced my people skills by following corporate policy to ensure guest satisfaction
- Coordinated with my team to fulfill guest orders for our Drive-Up Services
- Assumed leadership roles when necessary to cover breaks and call-ins

Projects

TeamStream

App created to enhance the team's ability to manage their workflow by showing a clear view for tasks across all project boards. Leveraged third-party APIs for data integration, enabling dynamic sorting and filtering of tasks by assignees and ticket statuses.

Caterpillar 3D Printing Marketplace Storefront

Led a team in developing a demo storefront for a potential Caterpillar venture into 3D printing for construction.. The project taught me the basics of the MERN stack and I was a leader for the team over the entirety of the course.

Personal Workout App

Developed a local React Native App for iOS that would track workout sets over a period of time. Incorporated local storage to save user data and provided intuitive charts for progress tracking.

Skills & Interests

Programming Languages: PHP, C++, Python, Java

Web Development: React, HTML, CSS, PHP, JavaScript

Database Management: MongoDB, MySQL
